## Problem Solved.

**1099 PRO**

# 1099 MANAGED HOSTING AND SERVICES

## World-class hosting. Ultimate security. Reliable service.

Our hosted environment provides optimum uptime, security, and bandwidth, ensuring peace of mind. Featuring the most up to date environment for Windows, the CoreSite facilities are strategically located along the area's rich fiber routes, offering robust connectivity within and between the data centers via cross connects, Any2 Internet peering exchange, fiber and DWDM service. All of the CoreSite facilities have passed stringent security certifications including a SSAE-16 Type 2 audit - the highest level of certification and security. 1099 Pro software runs directly from secure, dedicated servers within the CoreSite facility, so nothing needs to be installed on user computers saving your company time and money.

## CORESITE DATA CENTER

### FEATURES

- 99.9999% or higher uptime
- Raised floors
- Locked cabinet/cage
